

## CASE STUDY

# Devenish College, Enniskillen

Circa 11,500m<sup>2</sup>

## Main Contractor Glasgiven Contracts

## Screed Installed by Alpha Flow Screed

## Sector Education

Devenish College is a large secondary school constructed in the town of Enniskillen, Northern Ireland. Academic space comprises of 38x classrooms, 8x IT suites, 6x sciences labs, 3x technology & design workshops, 3x art rooms, 2x home economics labs, 1x library & 1x music suite. Sports facilities included 4x sports halls, 1x fitness suite, plus teaching and pupil changing facilities. Main contractor Glasgiven Contracts LTD successfully delivered this project alongside architectural practice Isherwood + Ellis.

**Mobicem C25F5 screed was chosen for this project as the contractor required a screed that could be installed at a minimal thicknesses to ensure that the underfloor heating system worked at optimal efficiency. Mobicem C25F5 screed was supplied and installed by Alpha Flow Screeds. The screed was delivered from a computerized automatic mobile mixing truck which mixes the screed on site.**
