

AT A GLANCE

PROJECT NAME

- 81 Piccadilly

PROJECT LOCATION

- 81 Piccadilly, London

MAIN CONTRACTOR

- Thirdway

CEMFLOOR SUPPLIED BY

- Capital Concrete

CEMFLOOR INSTALLED BY

- SAS Screeding

PRODUCT USED

- Cemfloor Level Plus

Cemfloor Level Plus was poured to a depth ranging from 12mm to 60mm above the services, providing a viable floor solution to accommodate the required ceiling room. Additionally a 3mm latex layer will be applied, followed by a 2.5mm vinyl layer.

PROJECT DETAILS

Cemfloor Level Plus was used in a project involving the renovation of a 5-story building.

The buildings existing floor was completely removed to allow for an increase in ceiling height, which necessitated the installation of service trenches for wiring.

The screed was chosen for its many benefits, including its cost effectiveness and ease of installation which meant that there were significant savings across all 5 floors when it came to time and labour.
