

## AT A GLANCE

### PROJECT NAME

- Cambridge City Football Clubhouse

### PROJECT LOCATION

- Cambridge

### CEMFLOOR SUPPLIED BY

- GemMix Ltd

### CEMFLOOR INSTALLED BY

- Flowscreed Ltd

### PRODUCT USED

- Cemfloor Therm C25

After several years without a permanent base, Cambridge City FC are hoping to move into their new stadium ahead of the 2024/25 season.

Their new club house will be an asset to Cambridge football club allowing them to host events and have refreshments for match days.

## PROJECT DETAILS

Cemfloor was chosen as the screed of choice for this stage of the project thanks to its many benefits including the speed of install and depths necessary, with Flowscreed laying 90m<sup>3</sup> of screed, at a depth of 60mm, over 2 days.

Other factors such as

- Reduced drying time compared to other screeds
- Easy Installation which reduced time and costs
- Foot traffic allowed after 24/48 hours

meant that other aspects of the project could continue without delay
